

Number trouble: 1-100 Group Work

- I am going to set the timer for **TWO minutes**
- When I say '**GO**',
 - highlight or circle all the numbers from **1-100** in **ORDER** (1, 2, 3, 4)
- Try to get **as many** numbers highlighted/circled as you can

STOP! – Put Highlighters Down

- If you noticed a pattern
 - **KEEP IT SECRET**
- The next TWO minutes you will be completing with the other groups in the class
- TALK to your team to come up with a strategy to get all the numbers highlighted/circled

STOP! - Within your Groups

- Share what worked and what didn't work in your group while completing this task
- Was there a pattern that you noticed?
